

Database and Web Development Experts

Business Intelligence/DW Specialist

Microsoft Certified Partner located in Falls Church, Virginia is seeking an intelligent and motivated business intelligence and data warehousing specialist. Our work is very challenging and intellectually stimulating and you will have the tremendous satisfaction of working with state of the art applications and watching your deliverables move rapidly into production and make a difference in the daily operations of our clients. We believe in rewarding individual achievement and encouraging innovation. Candidate should be able to work well both as a team member as well as independently. We value intelligent analysts who want to achieve a high level of success in their careers. If you have high standards, believe that your work is a reflection of yourself, and have a strong desire to be key player in a dynamic, growing company you should apply for this outstanding opportunity to grow with us.

Successful candidate will have experience with the full life-cycle of BI/DW development, including defining requirements, database design and data modeling, quality assurance and data cleansing, development and maintenance. This position requires communicating and collaborating with clients, project managers and staff. You will attend technical meetings and meet with users for requirements analysis and problem solving and will be responsible for developing and demonstrating proof-of-concept models.

The ideal candidate will have expert SQL programming skills and be able to create complex stored procedures. Candidate will also be well versed with modern BI/DW tools and Microsoft BI Technologies (Microsoft Reporting Services and Microsoft Analysis Services - with ProClarity experience a strong plus).

Responsibilities:

- Be a key player on a team that extends, designs, develops, and deploys state-of-the-art business intelligence solutions
- Develop top-quality BI strategy and architecture

Requirements:

- BS (preferably in Computer Science, Engineering, Mathematics, or related discipline).
- 2-3 years experience with Microsoft SQL Server and extensive experience creating stored procedures with complex joins.
- Experience with BI tools (Microsoft Analysis Services/ProClarity, Business Objects, Cognos, Balanced Scorecard, etc.)
- Basic understanding of business principles
- Experience with requirements analysis and client interaction

Salary & Benefits:

- Salary commensurate with experience.
- Six month review schedule, with salary increase and bonus potential, for exceptional work.
- 100% paid medical, dental, and life insurance for employees.
- \$2,000 training allowance per year.
